BESCHREIBUNG

Amazon Lab126 is an inventive research and development company that designs and engineers high-profile consumer electronics. Lab126 began in 2004 as a subsidiary of Amazon.com, Inc., originally creating the best-selling Kindle family of products. Since then, we have produced groundbreaking devices like Fire tablets, Fire TV and Amazon Echo. What will you help us create?

We are looking for a passionate, hard-working, and talented Software Development Engineer who can drive the development of a web engine that powers applications on consumer electronic devices. You will have an enormous opportunity to make a large impact on the design, architecture, and implementation of cutting edge products used every day, by people you know.

In this role, you will:

- Write clean, maintainable code and performing peer code-reviews
- Work with other team members to investigate design approaches, prototype new technology and evaluate technical feasibility.
- Work in an Agile/Scrum environment to deliver high quality software against aggressive schedules.
- Interact directly with internal and external partners to identify app requirements.
- Develop embedded software solution.
- Proactively identify and resolve technical risks and issues that may impair the team's ability to deliver

GRUNDQUALIFIKATIONEN

- 1+ years of professional software development experience
- Bachelor's degree in Computer Science or another technical field, or commensurate professional experience.
- Proficiency in at least one modern object-oriented programming language such as Java, C++ or C#
- Deep understanding of CS fundamentals including data structures, algorithms and complexity analysis
- Design and architecture knowledge as well as familiarity with object oriented analysis and design patterns (OOA/OOD)

BEVORZUGTE QUALIFIKATIONEN

- Working knowledge of programming languages beyond Java, C or C++ (e.g. Ruby, Python, Perl).
- Experience in communicating with users, other technical teams, and management to collect requirements, describe software product features, and technical designs.
- Experience building complex software systems that have been successfully delivered to customers
- Knowledge of professional software engineering practices & best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations
- Knowledge of design patterns
- Strong sense of ownership, urgency, and drive.
