

Software Development Engineer

Job ID: 1099174 | Amazon.com Services LLC

Bewerben Sie sich noch heute

BESCHREIBUNG

The Amazon Devices team designs and engineers high-profile consumer electronics, including the best-selling Kindle family of products. We have also produced groundbreaking devices such as: Echo and Alexa Devices, Fire TV, Amazon Cloud Cam, Amazon Dash and Fire Tablets.

What will you help us create?

The Team: LEAP (Launch Execution for Amazon Products) is looking for strong problem solvers to help us automate and scale the product development process for Amazon devices, from Kindle e-readers to the next generation of Alexa-enabled products. Our goal is to make it extremely simple to create, build and launch innovative devices in record-breaking time. As part of our team, you'll design and deliver high-impact software systems that will transform the next big idea into the products our customers know and love, at Amazon speed and scale!

In this role, you will:

- Own system architecture and development for major product initiatives
- Define the technical strategy for tackling our most challenging engineering problems
- Design and develop world-class software services at Amazon scale
- Work with diverse teams throughout Amazon to deliver mission-critical systems
- Mentor and develop a team of talented engineers to deliver innovative software solutions
- Establish technical standards across the organization to drive engineering excellence

GRUNDQUALIFIKATIONEN

- Bachelor's degree or higher in Computer Science or related technical field
- 8+ years of professional software development experience
- Experience leading the delivery of a software product from concept to launch
- Experience designing and building web services, distributed systems, and service-oriented architectures
- Proficiency in modern programming languages (Java, JavaScript, C#, C/C++, Python) and open-source technologies (Linux, MySQL, Spring, Hibernate, PostgreSQL)
- Strong computer science fundamentals (data structures, algorithm design, problem solving, complexity analysis)
- Strong object-oriented design skills

BEVORZUGTE QUALIFIKATIONEN

- Demonstrated leadership in cross-functional, highly collaborative environment
- Experience building complex, high-performance, and highly-available distributed software systems that have been successfully delivered to customers
- Demonstrated focus on continuous improvement of systems, software and processes through data analysis and metrics
- Experience with service-oriented architecture and web application/services development

- Experience working in a UNIX/Linux environment.
- Understanding of performance tradeoffs, load balancing and operational issues
- Ability to clearly and concisely communicate with technical and non-technical stakeholders across all levels of the organization
- Excellence in technical communication with peers and non-technical cohorts
- Proven track record of taking ownership and successfully delivering results
- Experience mentoring junior software engineers to improve their skills, and make them more effective, product software engineers.
- Experience driving software engineering best practices within your team
